

LAMBETH CONTRACEPTION CLINIC

If you live in Lambeth, you can now access long-acting reversible contraception (LARC) services from our South London (Brixton) clinic.

What is long-acting reversible contraception?

LARC stands for long-acting reversible contraception, such as the contraceptive implant and the coil. These methods are fantastic because not only are they the most effective and they don't interrupt sex, but they also are reversible so, if you want to, you can plan a future pregnancy at a time that's right for you.

About MSI Reproductive Choices UK

We provide NHS-funded reproductive healthcare services through our network of clinics across England. We are here to support you.
